With EasyAcc'Air, make deliveries easy under controlled temperature

The sectional door **EasyAcc'Air**, specifically shaped for **heavy goods vehicles** will make all your deliveries easier. Equipped with advanced technology, this **patented** rear-opening system has been designed to meet all your requirements for the distribution of goods under controlled temperature.

Ergonomic control

The opening and closing control of EasyAcc'Air is **waterproof** and **self-powered** (wireless, no batteries), simplifying its use.

Patented
N°1758653

Lecapitaine

Invisible opening

The **opening mechanism** is imperceptible and has no impact on the inside volume. This **clever positioning** solution creates an **optimal free passage** above the body. EasyAcc'Air only has an 80 mm repercussion on the overall height.

Intelligent Motorization

This motorization incorporates a **self-diagnostic** function, offering you **preventive maintenance**.

Enhanced insulation

EasyAcc'Air is engineered to withstand impacts and UV exposure thanks to its composite wall (fiberglass and polyurethane resin). The entire panel assembly is made of polyurethane insulation, providing enhanced **thermal insulation**.

Sturdy upright

The robust **profiles** are integrated into the partition thickness.

Optimal sealing

This **patented system** features an automated inflation mechanism for **perfect sealing** and keeping EasyAcc'Air in the closed position.

Make the choice of **cutting-edge** innovation

Optimized safety to protect operators and cargo from pinching through a presence detector. The sectional door is automatically held in the closed position.

Enhanced performance through optimal insulation and sealing, (certified class C sectional door) resulting in reduced fuel consumption and CO₂ emissions. The motorization and mechanics are silent and comply with the Piek label.

Maximized ergonomics with effortless opening and closing in less than 10 seconds to ease your deliveries and maintain the cold chain.

Minimized maintenance by its robust system. The motor's ingenious location makes maintenance quick and easy.

Enhanced hygiene thanks to a completely smooth surface and an opening positioned on the outside of the refrigerated bodywork, eliminating the entry of contaminants.
